

## GREAT PLACES AND SPACES

### Aston Martin Residences Miami

**Aston Martin Residences** is the first luxury residential project by the iconic automotive manufacturer in partnership with **G&G Business Developments of Argentina**. The project is notable for its 66-story height (818 feet), which will make it the tallest residential development south of New York City, and a marina along the Miami River that can accommodate a 300-foot superyacht. Some of the key amenities, including an infinity pool, sky bar, fitness center, movie theater, spa and business center, will take up 42,275 square feet from the 52nd to the 55th floors. Residences start at \$750,000 and go to \$50 million. Whoever buys the triplex penthouse also gets the \$3.2 million Aston Martin Vulcan on display at the sales center. The project is more than half sold and completion is expected in 2022.
